Water Treatment

WATER FLOW can design and supply a range of water treatment equipment from pressure filters to ozone disinfection equipment to reverse osmosis & ultrafiltration. WATERFLOW also designs facilities for the treatment of bore water or water from rivers and streams which require colloidal particle removal and disinfection. If purified water to a high standard is required then WATERFLOW can supply either a Nano or reverse osmosis system to ensure the cleanest water is available for any industrial or municipal application.

WATERFLOW will design and engineer a water treatment system for your application which will be cost effective and efficient.

Water Supply System

WATER FLOW offers a large range of water pressurization pumps, high pressure water pumps and motors for residential, commercial, and industrial water treatment applications. for all the required applications and types.

BOOSTER PUMPS

Booster pumps are devices used to increase the pressure of existing fluid flow system designed to help pumping Systems to achieve a higher system. They are low rates and overcome high system head. typically, booster pumps are used in water system or application that have low waste contamination. They have a variety of commercial, municipal and military application and are used in a range of industries including aerospace, mining, and food processing.

COMPANY PROJECTS

Water Flow is a specialized contracting and consulting company delivering integrated water solutions across Saudi Arabia and the Gulf region. We provide end-to-end services in the design, supply, and execution of:

Custom water features and fountains
 Swimming pools for residential, commercial, and public spaces
 Water pumping systems and booster sets
 Final treatment and filtration systems (RO, UV, sand filters)
 Turnkey water treatment and desalination plants We work closely with engineering consultants, developers, and public sector clients to implement sustainable, high-efficiency water systems that meet the highest technical and environmental standards. Our expertise spans from early-stage technical advisory to full project execution and after-sales support.

Water Flow provides innovative water solutions for B2B clients, including fountains, pools, pumping systems, and treatment plants—designed, built, and maintained to the highest standards.
